Contents

Docunotes Clinical Pocket Guide to Effective Charting is divided into three main sections:

1. SOAP Notes
2. Medical Terminology

3. Abstracting Medical Records

The **SOAP Notes** section provides a step-by-step guide on how to write SOAP notes. SOAP notes are a type of medical record that is used to document patient encounters. SOAP notes are typically organized into four sections: Subjective, Objective, Assessment, and Plan. The Subjective section includes the patient's symptoms and concerns. The Objective section includes the physical examination findings. The Assessment section includes the provider's diagnosis and prognosis. The Plan section includes the treatment plan.

The **Medical Terminology** section provides a comprehensive list of medical terms and their definitions. This section is essential for healthcare professionals who want to accurately and efficiently document patient care. The Medical Terminology section includes terms from all areas of medicine, including anatomy, physiology, pathology, and pharmacology.

The **Abstracting Medical Records** section provides instructions on how to abstract medical records. Abstracting medical records is the process of extracting relevant information from a patient's medical record. Abstracting medical records is essential for healthcare professionals who need to quickly and easily access patient information.

Benefits
