A nurse is caring for a patient with leukemia who is experiencing fatigue. Which nursing intervention is most appropriate?

(A) Encourage rest periods throughout the day. (B) Administer a stimulant medication. (C) Increase the patient's activity level. (D) Provide reassurance that the fatigue will pass quickly.

**Rationale:** A encourages rest periods, which is the most appropriate intervention to manage fatigue in a patient with leukemia.

### Question 2:

A patient with a recent diagnosis of lung cancer is exhibiting signs of depression. Which nursing action is most important?

(A) Refer the patient to a mental health professional. (B) Provide the patient with education about depression. (C) Encourage the patient to talk about their feelings. (D) Prescribe an antidepressant medication.

**Rationale:** A refers the patient to a mental health professional, which is the most appropriate action to address depression in a patient with cancer.

**Question 3:**

A patient with bone metastases is experiencing severe pain. Which medication is most effective for managing this type of pain?

(A) Acetaminophen (B) Ibuprofen (C) Morphine (D) Codeine

**Rationale:** C Morphine is the most effective medication for managing severe pain in patients with bone metastases.

**Question 4:**

A patient receiving chemotherapy is experiencing nausea and vomiting. Which nursing intervention is most effective in preventing these symptoms?

(A) Administer antiemetics before chemotherapy is given. (B) Provide the patient with bland foods. (C) Encourage the patient to drink plenty of fluids. (D) Administer antibiotics to prevent infection.

**Rationale:** A Administering antiemetics before chemotherapy is the most effective intervention to prevent nausea and vomiting.

**Question 5:**

Which type of cancer is the leading cause of cancer-related deaths in women?

(A) Breast cancer (B) Lung cancer (C) Ovarian cancer (D) Cervical cancer

**Rationale:** A Breast cancer is the leading cause of cancer-related deaths in women.

**Question 6:**

Which risk factor is NOT associated with the development of lung cancer?

(A) Smoking (B) Radon exposure (C) Obesity (D) Family history

**Rationale:** C Obesity is not a risk factor for developing lung cancer.

**Question 7:**

A nurse is communicating with a patient about their cancer diagnosis. Which communication technique is most effective in fostering trust and providing support?

(A) Active listening (B) Interrogative questioning (C) Providing facts without empathy (D) Using medical jargon

**Rationale:** A Active listening is the most effective communication technique for fostering trust and providing support.

**Question 8:**

A patient's family is struggling to cope with the patient's recent cancer diagnosis. Which nursing action is most appropriate?

(A) Refer the family to a support group. (B) Avoid discussing the diagnosis with the family. (C) Tell the family that they will adjust with time. (D) Encourage the family to isolate themselves.

**Rationale:** A Referring the family to a support group is the most appropriate action to help them cope with the diagnosis.

**Question 9:**

Which role is NOT a responsibility of the oncology nurse?

(A) Managing chemotherapy side effects (B) Advocating for patients' rights  
(C) Performing research to improve patient outcomes (D) Prescribing medications

**Rationale:** D Prescribing medications is not a responsibility of the oncology nurse.

**Question 10:**

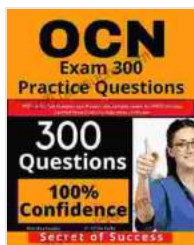

An oncology nurse is teaching a patient about the importance of follow-up care. Which statement is most important for the nurse to emphasize?

(A) Follow-up care is only necessary if the patient is experiencing symptoms. (B) Follow-up care is essential for monitoring the patient's health and detecting early recurrence. (C) Follow-up care is more important for older patients than younger patients. (D) Follow-up care is not required if the patient has completed cancer treatment.

**Rationale:** B Follow-up care is essential for monitoring the patient's health and detecting early recurrence.

This comprehensive review of 300 practice test questions and answers with rationale is a valuable resource for nurses preparing for the ONCC

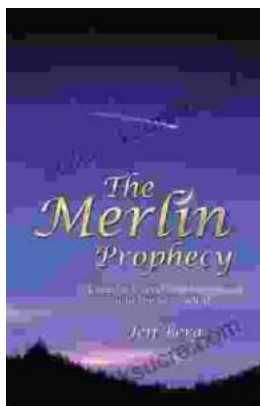

Oncology certification exam. By thoroughly studying these questions and understanding the rationales behind the correct answers, candidates can increase their confidence and improve their chances of passing the exam successfully.
